

Mohammed Mahrous

Madinah, Saudi Arabia | Mohammed.a.Mahrous@outlook.com | 0540064656 |
www.linkedin.com/mohammed | <https://github.com/ReanuxM>

Professional Summary

AI & Machine Learning Engineer with a Computer Science background and hands-on experience in developing intelligent systems, NLP applications, and deploying data-driven solutions. Skilled in Python, Scikit-learn, TensorFlow, and machine learning workflows including data preprocessing, model development, training, and evaluation. Combining strong software engineering fundamentals with AI expertise to build scalable and impactful intelligent solutions.

Professional Experience

IT Specialist

Al-Muna Kareem Hotel – Al Madinah, Saudi Arabia | Nov 2025 – Present

- Analyze technical issues, improve workflows, and implement effective technology solutions.
- Maintain enterprise applications, networks, and user environments.
- Improved technical workflows and operational efficiency through technology solutions.

IT Trainee

Maaden Barrick Copper Company (MBCC) | Jul 2025 – Aug 2025

- Supported enterprise systems, network operations, and technical troubleshooting.
- Improved system performance through configuration, maintenance, and problem-solving.

Education

- **Bachelor of Computer Science** | Islamic University – Madinah | Graduation: Sep 2025
 - **Relevant Focus:** Artificial Intelligence | Machine Learning | Data Science | Software Engineering

Professional Certifications

- **IBM AI Engineering Professional Certificate** (Expected Completion: 2026)
- **Fundamentals of Artificial Intelligence** – SDAIA | 2025
- **Introduction to Data Science** – Cisco Academy | 2025

Projects

- **NLP Text Classification System** | BERT + LSTM + Flask API | 2025
 - Developed, trained, and evaluated a deep learning NLP model for text classification | Achieved 96% accuracy
 - Deployed the trained model using Flask REST API.
- **Sentiment Analysis System**
 - Developed a sentiment classifier for customer reviews using NLP preprocessing and machine learning models.
- **House Price Prediction** (Regression)
 - Implemented a multiple linear regression model for housing price prediction using scikit-learn.
- **Spam Detection System**
 - Built a text classification model to detect spam messages using supervised ML and feature engineering.

Skills

- **Programming & Tools:** Python, Scikit-learn, TensorFlow/Keras, Pandas, NumPy, Matplotlib, Seaborn, Git, GitHub
- **Machine Learning & Modeling:** Supervised/Unsupervised Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning.
- **Deep Learning & NLP:** Neural Networks, BERT, LSTM, Transformers, Text Classification, Embeddings.
- **Data Processing & Visualization:** Data Cleaning, Exploratory Data Analysis (EDA), Visualization, Feature Scaling, TF-IDF, Tokenization.
- **Deployment & MLOps:** Flask REST APIs, Model Deployment, Inference Pipelines.

Languages

- **Arabic:** Native
- **English:** Fluent
